Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1,2,4-12 and 14-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dobrovolny et al in view of either Kunkel or Periman.

Dobrovolny et al discloses applicants' basic inventive concept, a support arm for a surgical device having three pivoting arm sections with lockable joints between arm sections, a table mount 28 and end effector 70, substantially as claimed with the exception of using a spring mounted jaw member which can be adjusted without rotation of a threaded member. Kunkel and Periman each show this feature to be old in the fastener art. It would have been obvious to one of ordinary skill in the art at the time

Art Unit: 3744

of applicants' invention from the teaching of either Periman or Kunkel to modify the support arm assemble of Dobrovolny et al by using clamps with a base part and a movable jaw which is held in place by a spring and adjusted without the use of threaded fasteners to enable easy adjustment while still providing a firm grasp. In regard to claims 18 and 19, all the cited devices can be manipulated by one person. Adding a second member to assist is seen as obvious use to possibly increase the accuracy or ease of adjustment. Since the second person is not performing a function that cannot be done by the first user, this is not seen as patentable invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harrington et al, LeVahn et al and Cabrera et al show surgical devices with clamping means between parts.
